

ASCEND
COLORADO

What Is Ascend Colorado?

Ascend is Colorado's online system to support implementation of the Individuals with Disabilities Education Act. Ascend will be available statewide to teams of educators, service providers, and families to develop and implement Individualized Educational Programs (IEPs). Ascend makes individualized planning easy by:

- Focusing attention on the student
- Simplifying processes and streamlining the use of data
- Providing tools that improve decision making and individualization
- Facilitating team member communication and collaboration

Additional System Features

The Ascend Colorado system is designed to support the work of teams providing individualized services to students with disabilities.

System Integration. Connect with other education systems like Data Pipeline and Student Information Systems.

Family Portal. Improve communication and engagement with families through our secure Family Portal.

Referral. Streamline child find by collecting referrals from families, educators, and public providers.

User Friendly. Clean, simple presentation makes it easy to build your IEP.

Flexible Navigation. Complete your work in the order that is best for your organizational style.

Accountability. Required elements of the IEP are embedded into the system to make compliance easy.

For additional information, please see the **Ascend Colorado website**.
